Pain in the feet, extending into the knees and hips, sometimes diagnosed as rheumatism, is mostly caused by a broken-down arch, flat feet or a displaced bone of the foot pressing on the muscles, ligaments and nerves.

I have invented two instruments (patent pending) to restore the displaced bones to their original positions, thereby removing the cause of the pain without any loss of time to the patients. Cases of twenty-five years' standing have been treated with success. No supporters, braces or strappings. Examinations free.

How Miserable This Woman Was Until She Took Lydia E. Pinkham's Vegetable Compound

Toomsboro, Ga.—"I suffered terribly with backache and headache all the time, was so weak and nervous I didn't know what to do, and could not do my work. My trouble was deficient and irregular periods. I read in the papers what Lydia E. Pinkham's Vegetable Compound had done for others and de-

for others and decided to give it a trial. I got good results from its use so that I am now able to do my work. I recommend your Veretable Compound to my friends who have troubles similar to mine and you may use these facts as a testimonial."—Mrs. C.F. Phillips, Toomsboro, Ga.

Weak, nervous women make un-happy homes, their condition irritates both husband and children. It has been said that nine-tenths of the nervous prostration, nervous de-spondency, "the blues," irritability and backache arise from some displacement or derangement of a wo-man's system. Mrs. Phillips' letter proves that no other remedy is so suc-cessful as Lydia E. Pinkham's Vege-table Compound.
